The ceremony was performed by Bishop Willis, assisted by the Rev. H. H. Gowen, in the presence of an assemblage which filled the Cathedral in every part. The bride, who has been a pupil at St. Andrew's for several years, and a most estimable young lady, looked very nice in her wedding dress with veil. The groom received part of his education in England, and at present is Principal of the Government English school at Ulapakua, Maui. The Misses Lucy Kalani and Koko were bridesmaids and Messrs. J. K. N. Keola and Kahoiki, groomsmen. The service was choral, two hymns were sung, and appropriate music was played on the organ as the bridal party entered and left the Cathedral.

After the ceremony a reception was held at St. Andrew's, where the schoolroom, which was prettily decorated with flags, flowers and evergreens. After congratulations ice cream and cake was handed around. A luau was a very pleasant affair.

No doubt a large number of persons will avail themselves of this opportunity.

There was a good audience at the Opera House last evening when the Tivoli Company presented the domestic drama "The Maid of the Mill" in a most acceptable manner. A short time ago thieves entered the chicken house on the premises of Mrs. Hoffman, on Wylie street, and carried off twenty chickens. Night before last twenty more were stolen, only five being left. There was a native feast back of the premises yesterday which might probably account for the disappearance of the chickens. The police should make inquiries.

The Planter's Monthly
For July is on our desk, and contains, as it usually does, interesting articles for planters, engineers and others engaged in planting and agriculture. Those relating to Fertilizers, the Jamaica Banana, disease of Sugar cane, Siberian Coffee, glucose and how it is made, and others equally valuable. In short, the whole pamphlet consists of instructive information, which others besides planters will profit from the perusal.

ITEMS FROM MAKAWELI, KAUL.

Our correspondent recently went over the line of the Hawaiian Sugar Co.'s ditch and reports great progress being made the last few months. Since the completion of the wagon road to the water head, the whole force have been concentrated on the ditch with telling effect.

A great deal of tunneling is being done in preference to hanging flumes to the perpendicular cliffs, as was originally intended. Manager Walsh stated that he could tunnel twenty-five feet inside and parallel to the face of the cliff, at much less cost than he could hang a flume to the outside, with the additional advantage of the tunnel requiring no future attentions in the shape of repairs, etc. This tunneling work is in the hands of practical miners from California, who unquestionably understand their business.

The hydraulic riveting machinery commenced operations last week on the forty-inch steel pipe and are doing splendid work. All the riveting on these water pipes is being done with these riveting machines. The riveting machinery, pipe and men are from the Risdon Iron Works, San Francisco, which is a sufficient guarantee of the success of this portion of the work, as the Risdon Works have made and laid more wrought iron and steel pipe of large diameter than any other firm in the world, one order recently completed required sixteen thousand tons of iron plates. This pipe was thirty-six inch diameter and was made and laid in the ground, finished completely, at the rate of 1000 feet per day.
